

# ASA South East Region Championships 2010

## Multi-Disability Events

Medals are awarded according to the n-1 scheme.

- If there are four or more entrants, medals are awarded to the first three
- If there are three entrants, medals are awarded to the first two
- If there are two entrants, a medal is awarded to the first swimmer
- If there is one entrant, that swimmer must beat their entry time (converted to a 50m pool basis) to gain a medal

Medal winners are indicated by \* above.

The latest points calculator for multi-disability we were able to obtain was the 2009 version. When we can get the 2010 version we will recalculate results and in the unlikely event that results come out differently, we will award additional medals.
